edddison
on
Sprout Pro by HP

What is edddison?

edddison enables real estate developers, architects, designers, managers, marketers, constructors and teachers to better explain, advertise, design, share ideas and sell products. edddison offering an intuitive and effective way to walk through 3D models while making decisions on the spot. It lets stakeholders be part of the decision-making process and gets them excited about their products in a new and fascinating way.

edddison consists of three parts

Editor

Turn 3D files into an interactive presentation. The editor enables the professional user to create interactive applications without programming skills.

Software plug-in

edddison is a extension for 3D-software:
- Autodesk Navisworks
- Autodesk Stingray
- SketchUp
- Unity3D

edddison on Sprout Pro by HP gets customers, designers and managers to stop being spectators and start communicating interactively with virtual 3D models. Users can walk through a planned house or take a seat in a futuristic car model. Virtual navigation in 3D models were never so easy than now.
